ABOUT THE COMPANY

Aquatex is an expert in maintaining fresh water systems and fighting freshwater pollutions on board vessels and offshore.

New cleaning method with approved products cleans FW tanks, hydrophores, UV systems and water pipes faster and with longer intervals of maintenance. This will save both time and money for the vessel and rig owners. Safety at work and the environment are important factors of modern cleaning methods.

Aquatex supply the patented fresh water treatment application, Anodix, to prevent Legionnaires Disease. Aquatex cooperate with service providers engaged in cleaning assignments in Denmark, Germany, Norway, Sweden.

CORE COMPETENCES

Advice, maintenance, cleaning products and equipment to remove scalings and bacterias in FW-tanks, FW-piping, heat-exchangers, cooling systems, aircon, EVAC, drains and surfaces. Supply of Fast Legionella Test Kits, AnodiX chemical-free water treatment to replace UV-filters and removal of legionella bacterias in potable water systems.
